EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Viola T. Kung on 11/10/04. The application has been amended as follows:

In the claims:

Claims 1-16. (cancelled)

Claim 17. (Currently Amended) A process for the manufacture of an electrophoretic display, which process comprises:

- a) forming microcups on a first non-conducting substrate wherein said microcups have side surface and bottom surface and are separated by partition walls having top surface;
- b) forming a first conductive layer on the side surface and the bottom surface of the microcups and the top surface of the partition walls;
- c) filling the microcups with an electrophoretic fluid;
- d) sealing the filled microcups; and
- e) forming a second conductive layer over the filled and sealed microcups; ~~and optionally~~
- ~~f) removing the first conductive layer on the top surface of the partition walls.~~

REASONS FOR ALLOWANCE

2. Claims 17-30 are allowed. The following is a statement of the examiner's reasons for allowance. The present application relates to electrophoretic display comprising isolated cells of well-defined shape, size and aspect ratio which cells are filled with charged pigment particles dispersed in a dielectric solvent and sealed, and novel processes for its manufacture. Regarding claim 17, the prior art alone or in combination fails to disclose or suggest the novel and distinct sequential steps of the process for the manufacture of an electrophoretic display. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

3. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Information/Remarks

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gerace (U.S. Patent No. 5,223,106) discloses electrophoretic sealants.

Art Unit: 2873
